Local Officials Directory Five Years Later

Written by David L. Davies, Director of Information Technology, Division of Local Services

Time flies. About five years ago, I introduced the [Division of Local Services](#) (DLS) plans for a [Local Officials Directory](#) to various associations, including a meeting of the Town Clerks Association. At that time, Local Services had the same system for communicating with different local officials that we had used for the last twenty years: request some labels addressed to "Clerk" or "Town Administrator" with city and town hall addresses, peel and stick the labels onto stuffed envelopes, and carry to the mail room. The choice for an alternative approach was stark but simple. Keep on peeling labels or somehow manage thousands of constantly changing position identities and email addresses among all the cities, town, and districts. We made the plunge into individually-addressed email, but we needed the assistance of city and town clerks to keep up with the ever-changing roster of local officials.

Governor's budget for FY2011 supports Cities and Towns

Governor Deval Patrick's proposed [FY2011 budget](#) has spared cities and towns a reduction in local aid, news which has heartened local officials.

The Governor's proposed full funding of Chapter 70 at \$4.048 billion ensures that federal stimulus dollars used to backfill the account in FY2010 will be replaced by state General Fund dollars in FY2011. This ensures that every school district will receive Chapter 70 funding that meets or exceeds the level of funding received last year.
